Experience

NOI Technologies Pvt. Ltd.

Sept 2024 – March 2026

Junior Developer

Remote, Jaipur

- Led development in company's 3PL product, refactoring 1,000+ LOC and reducing API calls across 50+ screens, improving performance and efficiency.
- Built a Next.js-based AI chatbot with cross-platform SDK and voice-to-voice capability, enabling automated communication workflows.
- Enhanced e-commerce platform by developing core features (homepage, product flow, wishlist, checkout, filtering), improving user engagement.
- Developed company website using Bootstrap, creating reusable components and reducing 300+ LOC across 13 screens

CodSoft

July 2023 – August 2023

Web Development Intern [Link](#)

Remote, Maharashtra

- Acquired proficiency in HTML, CSS and JavaScript for creating and styling web pages.
- Worked in a collaborative environment to style and design web-pages.

Projects

CodeForge | [ReactJS](#), [NodeJS](#)

[GitHub](#) [Live](#)

- Built a full-stack collaborative code editor (React, TypeScript, Vite, Tailwind, Node.js/Express) supporting real-time execution of Python and JavaScript.
- Engineered a Socket.IO-based real-time pair-programming system with live code syncing, throttled cursor/mouse tracking, and auto-rejoin after refresh.
- Implemented a unanimous-approval voting system for live language changes, with user join/leave notifications and an active members list.
- Developed real-time code execution using Node.js child processes with syntax/runtime error handling and abort support via AbortController.
- Integrated a CodeMirror 6 editor with syntax highlighting, code folding, and localStorage-based auto-save.

Rufaad BNPL | [ReactJS](#), [NodeJS](#), [Prisma](#), [PostgreSQL](#), [Tailwind CSS](#), [MUI](#), [Firebase](#)

[GitHub](#) [Live](#)

- Built a full-stack B2B BNPL financing platform with three portals (admin, buyer, merchant) on a shared Node.js/Express and PostgreSQL backend.
- Designed a large relational database with Prisma ORM spanning users, merchants, buyers, orders, payment plans, and documents with enforced referential integrity.
- Implemented role-based access control with permission-gated routing and per-portal auth isolation (separate httpOnly cookies and JWT secrets).
- Built an OTP-based login flow with time-expiring codes for secure, passwordless authentication.
- Built interactive analytics dashboards with Recharts, visualizing order and product status distributions from real-time data.

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS, SQL

Front End: ReactJS, NextJS, Redux Toolkit, TailwindCSS, MUI, Ant Design

Back End: NodeJS, Express, Prisma, Mongoose, REST APIs

Databases: PostgreSQL, MongoDB

Tools: Claude, Git, Firebase, JWT

Education

University of Mumbai

Oct. 2021 – May 2024

Bachelor of Science in Computer Science - 8.14 CGPI

Mumbai, Maharashtra
